PROJECTS

Dush Logger

A file logger for Javascript apps. Allows you to configure how emitted logs are written to text files and formatted. **(Do not recommend usage)**

JavaScript

Service Availability Tracker

This project is a custom service status tracker demo designed to monitor the availability and latency of various services such as SaaS, APIs, websites, or any other services. The demo utilizes Azure Application Insights (Monitor) to collect and track the status of a specified URL every 5 minutes. The collected data is then displayed using a React-based frontend, mimicking the style of the Discord Status page.
